BILLIARD CROWN

Pool table room measurements

Print and record actual measurements in inches. Use the table and cue you intend to buy.

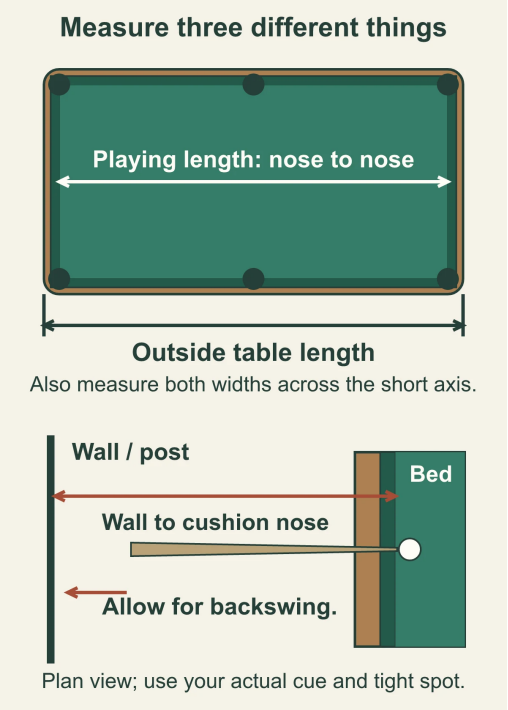

Room / address _____ Date _____

1 Measure the actual table

Playing surface: between opposing cushion noses. Outside size: the widest cabinet or rail edges.

Playing surface	Length	_____	in	Width	_____	in
Outside table	Length	_____	in	Width	_____	in

2 Check the room and your stroke

Clear room length (in) _____

Clear room width (in) _____

Actual cue length (in) _____

Tightest cushion-nose-to-obstacle gap (in) _____

Obstacle and location (post, wall, furniture) _____

Extra room needed for your backswing (in) _____

Try the actual stroke at playing height.

A cue-length gap alone does not allow for backswing.

3 Before you commit

- ☐ Mark the playing surface and outside footprint separately in the room.
- ☐ Test a full stroke beside the tightest obstacle and with doors open.
- ☐ Check walking space with furniture and seating in their normal positions.
- ☐ Have the mover approve packed-piece access at both addresses separately.

Compare the verified room-size chart and the exact model before ordering.
